ESRI International Collaboration Projects 2006

Investigation on the reconstruction
of central and local government finance
in the declining and aging population*

March, 2007

Shin Saito, Osaka University (Project leader)
Atsushi Yoshida, Tsukuba University
Kyoji Hashimoto, Kansai University
Toshiyuki Uemura, Toyo University
Masahiro Hidaka, Osaka gakuin University
Satoko Maekawa, Kansai University
Eiji Sumi, Niigata University
Hiromichi Uto, Kwanseigakuin University
Yoshiaki Kitaura, Kansai Institute for Social and Economic Research
Kanae Musha, Kansai Institute for Social and Economic Research
Ryo Ogawa, Osaka University
Sunchung Oh, Kansai University
Yurie Saito, Toyo University
Hideo Yunoue, Osaka University

* The authors gratefully acknowledge the suggestions and comments of Professor Jean-Francois Tremblay and Professor Hiroshi Mifune
TABLE OF CONTENTS

Chapter 1:

Simulation Analysis of Japanese Future Fiscal Conditions under the Integrated Reforms of Expenditure and Revenue 2006

1. Introduction
2. Outline of “Integrated Fiscal Reform of Expenditures and Revenues”
3. Methodology
4. Simulation Results
   4.1 Base Case (nominal GDP growth rate: 3%, nominal interest rate: 4%)
   4.2 Sensitivity Analysis
5 Concluding Remarks
References

Chapter 2:

Generational Gap in Public Benefits and Burdens under the Integrated Reform of Expenditures and Revenues 2006 in Japan

1. Introduction
2. Relation between Government Debt and Primary Balance
3. Methodology and Data
4. Estimation Results
5. Concluding Remarks
References
Chapter 3:
The Impacts of Integrated Reforms of Expenditures and Revenues on Local Governments

1. Introduction
2. Analysis Method and Data
   2.1 Data preparation for analysis
   2.2 Analysis Method
   2.3 Simulation method for comprehensive expenditure and revenue reform
3. Results
   3.1 Primary balance
   3.2 Local government bond issues and balance (sheet)
   3.3 Local allocation tax
   3.4 Special account for debt of local allocation tax
4. Conclusions
Tables and Figures
References

Chapter 4:
Impacts of a Declining and Aging Population on Central and Local Government Expenditures in Japan

1. Introduction
2. Methodology for estimating present and future expenditures
   2.1 Model for estimating present national expenditure
   2.2 Methodology for estimating future central government expenditure
   2.3 Estimation model for local expenditure
   2.4 Methodology for estimating future local expenditure
3. Prediction of government expenditure
   3.1 Prediction of central government expenditure
   3.2 Contribution of factors changing central expenditure
   3.3 Forecast of local expenditure
Chapter 5:

The Impact of the Declining and Aging the Population on the Livelihood Assistance Allowance of Local Public Finance in Japan

1. Introduction
2. Existing Studies and Contribution of this Paper
3. Income Distribution Model
   3.1 Estimation of Income Distribution Factors by Age
   3.2 Estimation of the Household Characteristics by Prefecture
   3.2 Application of the Livelihood Assistance Allowance System
4. Simulation Analysis of the Declining Birthrate and Aging of Society on the Livelihood Assistance Allowance System
5. Conclusion
References
Tables and Figures
Appendix

Chapter 6:

Estimation of Loss of Tax Revenue due to a Declining Number of Children and an Aging Population

1. Introduction
2. Analysis Method
   2.1. Historical Trends in the Elasticity of Tax Revenue
   2.2. Survey on Elasticity of Tax Revenue
   2.3. Estimates of Income and Local Income Tax Revenues
3. Analysis Results
3.1. Simulation Patterns
3.2. Forecasts of Income and Local Income Tax Revenues
3.3. Effects of Population Decrease on Tax Revenue

4. Conclusion
References

Chapter 7:
Cost Frontier Analysis for Elderly Welfare Expenses

1. Introduction
2. The Model
3. The Data
4. Empirical Results
   4.1. Results of Stochastic Cost Frontier Regression
   4.2. Results of Cost Efficiency Index
5. Conclusion
References
Tables and Figures

Chapter 8:
Budgetary Systems and Moral Hazard in National Health Insurance and Long-term Care Insurance

1. Introduction
2. Institutional background and literature survey
3. Data and Estimation Results
   3.1. Data
   3.2. Comparison of degrees of moral hazard on expenditure
   3.3. Marginal effects of health or LTC services on health outcome
4. Discussion
References
Tables and Figures
Chapter 9: An analysis of the so-called new local allocation tax

1. Introduction
2. Regression analysis
3. Simulation Results
4. Conclusions
References
